Assistive Technology

Assistive technology is any service or tool which can help an older person or a person with a disability perform activities that might otherwise be difficult or not be possible.

Assistive Technology Needs Assessment

Questions to Ask:

- What type of activities are you involved in?
- What tasks do you need help with?
- How often do you need help?
- What are your current abilities, personal characteristics, experience with AT and what is your environment or support services?
- What type of assistive technology will meet your needs? What is available to meet your needs?
- Does the assistive technology have the capabilities to accomplish the identified tasks?

Assistive Technology Needs Assessment

Simply Put:

- **Consider the problem and determine what is available to solve the problem.**
- **Develop a plan of action.**
- **Create an environment for success, independence, and an improved quality of life!**

FUNDING

Paying for Assistive Technology

Medicare Part B may cover up to 80%, of the costs.

The Veterans Administration may pay for a portion of the costs.

There are grants and non-profits that may assist with the purchase of equipment.
