Funded/In Review Grant Activity:

Current funding:

Flynn S (PI); Struessel T (Co-I and University of Colorado site coordinator), Stevens-Lapsley J. The Oaks: A Mobile Exercise and Education Program for People with Osteoarthritis of the Knee. NIH R44 AG055341. 2/1/18-1/31/19 (\$725,915). The goal is to develop and test of a minimum viable product of The Oaks, a perioperative, digital, education, assessment and guided exercise software application for adults with osteoarthritis of the knee awaiting total knee replacement surgery.

Completed Support

Stevens-Lapsley JE (PI), Schenkman M (Co-I), Korht W, Wolfe P, Struessel T (Clinical coordinator), Kluger B, Eckhoff D. Progressive Rehabilitation for Total Knee Arthroplasty. The major goal of this project is to evaluate the effectiveness of a more intensive rehabilitation program compared to traditional rehabilitation after total knee arthroplasty. National Institutes of Health (NIH) / Eunice Kennedy Shriver NICHD. Awarded 2011-2016 (\$2.29 million)

Struessel T (PI), May J, Sonnenberg E, Carpenter K, Mintken P. An evidence based paradigm: student perceived barriers to learning to practice manipulation. The purpose of this study was to assess student-faced barriers to practicing evidence-based orthopedic interventions, specifically thrust manipulation. Grant awarded February 2008. Role: Primary Investigator. (\$3000)

Stevens J (PI), Struessel T, Bade M. Optimizing lower extremity muscle function after total knee arthroplasty. American College of Rheumatology New Investigator Award. The goal of this study is to investigate quadriceps force and reflex inhibition after TKA and explore rehabilitation strategies to minimize these deficits after TKA. Role: clinical consultant. July 2007-June 2009. (\$100,000).
