In this document, “Resident” refers to both specialty Residents and subspecialty Fellows.

Policy Purpose

Describes various types of leaves of absence including, Family Medical Leave (FMLA), Vacation, Sick, Military, and other leaves of absence. Processing and documentation requirements are included.

Program Directors exercise their discretion when approving requests for most leave types excluding Sick Leave and FML. Program Director considerations when approving leaves must include:

- Effects of the leave on other residents and the training program
- Impact of the leave as it applies to the Resident’s satisfactory completion of the program and eligibility to participate in certifying board examinations

All leave requests are to be handled in a manner that is mutually supportive to the Resident and the patient care obligations of the program.

Each program must have a policy or procedures in place to ensure coverage of patient care when a Resident is unable to accomplish patient care responsibilities due to fatigue, illness, healthcare appointment, or any other approved leave.

Leaves may require an extension of time in the training program for the Resident to satisfy program requirements.

- Program Directors must provide the Resident with information as to how total leaves will impact their program completion date, their eligibility to participate in examinations by the relevant certifying board.
