Research Study Investigates Aging, Memory and Immune Function

How Does COVID-19 Affect the Aging Brain?

The University of Colorado Anschutz Medical Campus is looking for interested adults 60+ to participate in a research study examining how inflammation influences memory and thinking. This study is seeking older adults who have recovered from COVID-19 AND older adults who have never tested positive for COVID-19. Data gathered from this study will be used to better understand how inflammation and COVID-19 exposure impact brain health and aging outcomes.

Participation involves two research visits over the course of two years. Compensation provided.

Procedures Include:
- Memory and thinking tests
- Health history questionnaires
- Blood sample
- Spinal fluid sample
- MRI of brain
- SARS-CoV-2 antibody test (results provided)

You may qualify if you are:
- 60 years or older
- In good general health
- Have NOT been diagnosed with a memory disorder
