

# PARTICIPATE IN RESEARCH STUDIES

## WHY PARTICIPATING IN RESEARCH STUDIES?

Scientists continue to look for answers to treating, preventing, or curing the major causes of death and disability that we face today: heart disease, stroke, cancer, and dementia.

They are also seeking to learn how to improve patient care and quality of life for caregivers. A lot of progress has been made, but much more needs to be done. Scientists working today need the help of many people, including older adults, to participate in many types of research studies to help find answers.

## INTERESTED IN PLAYING AN ACTIVE ROLE IN IMPROVING HEALTH CARE FOR OLDER ADULTS?
