

## CCPM Staff Membership – Guidelines (Eligibility, Expectations, Benefits)

The CCPM Staff Membership program aims to provide a community for staff who wish to engage with and advance joint efforts between UHealth and CCPM to implement personalized medicine to advance research and improve patient care. Numerous CCPM efforts have been, and will continue to be, shaped by individuals on campus who are connected to but not directly employed by CCPM. This program provides opportunities to engage directly with personalized medicine in unique ways.
