[Minimally Invasive Procedure Fixes Hole In Baby’s Heart: ‘She’s Louder, More Lively’](#)

“About half of the children with Down Syndrome have congenital heart disease,” explained **Dunbar Ivy**, pediatric cardiologist at Children’s Hospital Colorado [and professor of pediatrics at CU School of Medicine].

Charlie had a hole between the two collecting chambers of her heart. “Too much blood goes from one side of her heart to the other, making her heart inefficient,” said **Gareth Morgan**, pediatric interventional cardiologist at Children’s [and associate professor of pediatrics at CU School of Medicine].

[Next 50 is taking care of our elders](#)

“I’m particularly interested in helping LGBTQ individuals, and particularly the older population, just given the disparities they face,” said **Carey Candrian**, [assistant professor of medicine at the CU School of Medicine and] co-director of the Next 50 Initiative with **Hillary Lum**, [assistant professor of medicine at CU School of Medicine]. “Older LGBTQ individuals are more likely to go back into the closet, and many are living in poverty and less likely to have kids, be married, or have caregivers. They are more likely to live alone and be lonely.”

[Physimax Developing Mobile Injury Risk Screening Product for General Public](#)

“The pro athlete stuff is sexy and it’s cool and all that, but if we can take this technology to everyone and get it on a cellphone—just the potential you have to minimize low-back pain, frontal-knee pain, and some of these conditions, you can really make a huge societal impact, keep people healthier, and decrease health-care costs to the country,” said **Thomas Noonan**, an orthopedic surgeon who serves as the head team physician for the Rockies and a practitioner at the UCHHealth Steadman Hawkins Clinic [and assistant professor of orthopedics at CU School of Medicine]. “That’s the big goal with this technology. These things can change lives at a global level.”

[Is vaping dangerous? University of Colorado Anschutz Medical Campus analyst isn’t sure](#)

So while the risk may not be as high as cigarettes, **Jim Pavlik**, a Program & Policy Analyst from the University of Colorado Anschutz Medical Campus, wants people to know that there might be some risk. “We want to let (kids) know we don’t know what they are doing to themselves,” Pavlik said. “The risk is not zero, but it’s also not cigarettes.”

Canon City Daily Record, June 20, 2019

[Easy to use toolkit improves lab safety in primary care practices](#)

“Laboratory testing errors are more likely than other ambulatory errors to be associated with increased risk of harm,” **Bethany M. Kwan**, of the department of family medicine at the University of Colorado School of Medicine, and colleagues wrote.

['They have never had their own hospital': UCHealth opens newest Denver-area facility](#)

“We are excited to bring innovative care and an excellent experience to residents in one of the fastest-growing areas of the state,” said UCHealth President and CEO **Elizabeth Concordia** in a statement. “It is important for us that our patients have access to advanced care close to home. With improved access to nationally recognized specialists, advanced treatments and clinical trials, we are making health care more convenient and effective, and helping people live their extraordinary lives.”

Denver Business Journal, June 18, 2019

[UCHealth celebrates opening of Highlands Ranch Hospital](#)

“Specialists from the University of Colorado School of Medicine and University of Colorado Hospital offer clinical trials and innovative treatments sometimes years before they’re more broadly available, giving patients the best possible outcomes,” said UCHealth Highlands Ranch Hospital Chief Medical Officer **Tom Purcell**, who is also the associate director for clinical services at the CU Cancer Center. “This new hospital will allow patients in this area to receive many of these advanced treatments without having to travel to the Anschutz Medical Campus.”
