[‘Part of something bigger’: Partnership between CU, CSU welcomes first medical students](#)

The first medical students to benefit from a new partnership between Colorado State University and University of Colorado School of Medicine aren’t having the year anyone expected when the program was announced last year. The partnership began in June on the CSU campus, when 11 students from CU’s Anschutz Medical Campus in Aurora came to Fort Collins to begin the clinical rotations that make up the third year of their four-year program.

Most of the students in the program this year, **Peter Boxley** said, have a previous connection to Fort Collins or the surrounding area. He and **Nick Mason** are both graduates of Fort Collins High School, another is a graduate of Poudre High, one grew up in Loveland and several others received their bachelor’s degrees from CSU, he said. [Effective mentorship doesn't have to be about seniority](#)

"We started our group because we felt that, as women in academic medicine, we really needed to support each other," says lead study author **Melanie Cree-Green**, associate professor of pediatrics-endocrinology at the University of Colorado School of Medicine, in a [press release](#).

"Our group of eight women formed three years ago and meets every three weeks. In that time, we have had five promotions, major grant funding – and other positive career milestones that happened thanks in part to our support for one another," adds study co-author **Jill Kaar**, associate professor of pediatrics-endocrinology at the University of Colorado School of Medicine.
