[Colorado still has a gulf between white, Hispanic vaccination rates, frustrating advocates](#)

“It’s a deadly embarrassment that Colorado is still doing so poorly at vaccinating our Latino/Hispanic residents,” said **Matt Wynia**, the director for the Center for Bioethics and Humanities at the University of Colorado School of Medicine.

Denver Gazette, March 5, 2022

[We’re Entering a Period of Relatively Low Covid Risk for Kids](#)

It looks as if a third dose may be in the future for children 5 to 11 as well, said **Sean O’Leary**, a pediatric infectious disease specialist at the University of Colorado. “We’ve recognized in adults this may be more of a three-dose series anyway, so it may be in the future the third dose is going to be the recommendation,” he said.

The New York Times, March 5, 2022

[Physicians’ biggest threats](#)

Vikas Patel. Executive Vice Chair of [Orthopedics at] University of Colorado Medicine: The biggest threat facing physicians right now is the business of medicine. Medical care for physicians has become much more of a business from every aspect compared with what used to be the “art” of medicine. Physicians are now pressured to see more patients in the clinics and document more irrelevant aspects of the visit, far more than spending time getting to know their patients and understanding their patients’ problems.

Becker’s ASC Review, March 7, 2022

[Improving Outcomes for Drug Use – Associated Endocarditis](#)

Led by **Joshua Barocas**, associate professor of medicine at the University of Colorado School of Medicine, researchers investigated the efficacy of outpatient treatment for infective endocarditis. They created a robust model that simulated the natural history of injection opioid use in 5 million individuals.

IDSE Infectious Disease Special Edition, March 7, 2022

[How Cold Is Too Cold to Exercise Outside?](#)

William Cornwell, a cardiologist at UHealth [and assistant professor of medicine at CU School of Medicine] specializing in exercise and sports medicine, agrees most people are OK exercising in extreme cold—so long as they are young and healthy.
