[That Lead Apron in the X-Ray Room? You May Not Need It](#)

“There’s this big psychological component, not only with patients but with staff,” said **Rebecca Marsh**, a medical physicist at the CU Anschutz Medical Campus, who spoke about shielding at a December forum here at the annual meeting of the Radiological Society of North America. “How do you approach something that is so deeply ingrained in the minds of the health care community and the minds of patients?”

[Some hospitals are ditching lead aprons during X-rays](#)

Technologists especially will need support in educating patients and families “so they are not feeling like they are walking into a disastrous conversation,” said **Rebecca Marsh**, the medical physicist. She is doing her part. At the radiology conference, Marsh strummed a banjo and sang her version of the Woody Guthrie ballad “So Long, It’s Been Good to Know Yuh,” with lyrics like: “To get rid of shielding at first may seem strange, but the time is upon us to embrace this change.”

### [Telemedicine support group offers convenience, community to young adults with cancer](#)

“We know that our younger patients are often still working; many of them have young families,” **Laura Melton**, medical director for supportive oncology at University of Colorado Cancer Center at University of Colorado Hospital, said. “They’ve got not only their own schedules to think about, but also children to consider. This is also a group of people who are somewhat marginalized by the fact that there are fewer people in that demographic who get cancer.”

### [Few American Consider Religious Affiliation of Hospitals](#)

“People may expect restrictions on abortions but they are surprised to find common services like birth control are also restricted,” said the study’s lead author **Maryam Guiahi**, associate professor of obstetrics and gynecology at the CU School of Medicine. “They don’t realize that they may not be getting care based on science but rather the care they get is based on religious dogma and doctrine.”
