Post Clerkship Curriculum Newsletter

Dear Directors & Coordinator,

Thanks for your tireless work to help our students succeed in 2021, especially in the face of so many challenges! We wish you a happy and restorative Holiday Season. As we head into 2022, we find our current Class of 2022 students interviewing for residencies, completing the remainder of their 4th year, and looking forward to match and graduation.

At the same time, the Class of 2023 will return from their holiday break to complete the last portion of their core clerkship year and start working with their advisors to plan their 4th year. In this edition of the newsletter you will find the updated Class of 2023 phase IV student guidebook and academic calendar.

We are awaiting updates to national guidance about away rotations for the next academic year and will provide these when available.

The post-clerkship curriculum will expand with the Class of 2024 Hybrid curriculum and the Class of 2025 Trek curriculum, where students will have more time and opportunities to complete advanced integrated science courses, critical care experiences, specialty preparation, and leadership training. Since this phase will include portions of the 3rd and 4th years of medical school, it will be known as the post-clerkship phase instead of phase IV. We look forward to providing detailed updates about the new post-clerkship experiences in future newsletters.

Please look for opportunities to be involved in teaching at the end of the newsletter and let us know if you have questions, or would like to be more involved in the post-clerkship curriculum.

Happy Holidays!

DECEMBER 2021

School of Medicine

UNIVERSITY OF COLORADO ANSCHUTZ MEDICAL CAMPUS

School of Medicine Instructional Design

December 2021 Curriculum Reform Newsletter

The Trek curriculum has been designed using evidenced based learning theory, including the implementation of active learning techniques to encourage student engagement in the topics of medicine. The newly created instructional design team is tasked to guide and support these efforts. The team is available to partner with course directors and course faculty to apply best practices in instructional design.

The Instructional Design Team Can Help

How can the instructional design team help you? Our instructional design team is here to support you with faculty/staff resources, offering instructional design support/advising, and more! As part of the Trek curriculum, we work to assist faculty and course directors for the best teaching and learning experiences possible by:

- Helping to create accessible and effective course materials (e.g., PowerPoints, Word Documents, graphics, and videos).
- Advising on teaching plans to improve student engagement.
- Brainstorming ideas for utilizing North Star, our learning management system.
- Offering School of Medicine approved educational technology tools and best implementation methods.
- Referring you to multimedia resources, such as our North Star training communities, live Zoom training/consultations, articles, videos, and upcoming learning opportunities.
- Consulting with faculty and staff.

School of Medicine
UNIVERSITY OF COLORADO ANSCHUTZ MEDICAL CAMPUS

Instructional Design for Trek

How the new instructional design team can help you!

Learning event design

Are you planning a lecture for med students in Trek? Do you need ideas for engaging students with your content? The Instructional Design team would like to meet with you to talk about ways to engage and challenge students with your content. There is a wide range of options from simple, like using the audience response system during your lecture, to more complex like using team-based learning.

Accessibility & effectiveness

Do your materials support the principles of Universal Design for Learning (UDL)? Have you assessed your slides for color accessibility? We can help with this! Thinking about UDL when creating your content can make it more accessible to technologies like text to speech readers. This adds value by increasing the ways that students can digest your materials. This helps everyone.

Best practice models for Trek learning

We have a growing library of resources including instructional how-tos and examples to help you create slides, narrative notes, and short videos.

Technology recommendations

We keep an inventory of the approved technologies for medical students. This list has been evaluated by OIT for security and compliance and is supported by the SOM and Trek leadership. We can also help assess new technologies for Trek learning and put them through the review process if necessary.

Consulting

We want to meet with you! You can book an appointment online and we will see you on Zoom!
