Primary Care Response: COVID-19

LET’S TAKE A QUICK LOOK AT THE RESULTS

Testing availability remains low. Only 24% of respondents reported having an FFR available for testing.
The majority (95%) have recommended 10 or fewer patients for testing.
14% of respondents are regularly working and communicating with their local public health department.

We continue to hear that COVID-19 is impacting the financial survival of practices.

DRIER DEEPER INTO SURVEY RESPONSES

Results show that there is a noticeable lack of support. Respondents shared the following in what is perceived as an unmet need.

- 20% of respondents are having trouble with documentation and report that they need more help.
- 16% reported difficulties with Telemedicine.
- 15% reported difficulties with telehealth.
- 13% reported difficulties with COVID-19.
- 12% reported difficulties with financial support.

Count your blessings, divisions, and strategies that could be helpful.

- Decreased patient volume/limited income of care.
- Telehealth.
- Traveling 40+ miles.
- KRMC.
- CEC.
- Not feeling like being attacked for what I have.

Thank you again to the 38 people that responded!

Thank you for the questions that you have asked. We are working on quick responses.
Many of the questions received can be answered in the following resources section!

Thank you again for your support. Survey #3 will launch on Friday, April 17th and a report of results will come out the week of April 17th.

In the meantime, please keep in touch! Follow along on Facebook for more frequent updates. Search “SNOBAP” to follow!

We are happy to hear from anyone who wishes to reach out to us. Please know that we are sharing these data broadly to inform responses to the crisis. Thank you for sharing your story or how we can help respond.
