NOTE

COMMUNITY RESOURCES: This report provides descriptive statistics across practices that responded to this survey.

HOUSING/SHELTER breakdown of visit types is shown in the line chart, below:

- All but 2 practices are now conducting telehealth visits (n = 86).
- Deciding to continue use of video-based patient visits (76% in May compared to 86% in June). Additionally, rural/frontier practices will work with family to find resources that connect to food bank.
- Respondents report that they are testing based on the following: optional contact section while this rate is actually lower than our May survey, it is still concerning. We have decided to add a separate section.
- Need a more detailed timeline (for large clinics or hospitals). Should we be swabbing for flu, doing strep tests, and nebulizer treatments outside, as we have.
- 4 respondents reported “other” to include: Payroll has quitting/quit.
- 92% of responding practices noting impact to business to a
