**Definitions**

**Principal Investigator**

The principal investigator is the person responsible for the conception and design of the study and the analysis and interpretation of the data. The principal investigator is identified early in the study design process.

**Network Director**

Network Directors are appointed as described in the bylaws. All research is under the jurisdiction of the Director.

**Primary Publication**

A primary publication is one that details the design, methods, or primary results of a SNOCAP study.

**Secondary Publication**

A secondary publication is one that details a secondary aim of a SNOCAP study or a question developed and pursued by an investigator using SNOCAP resources; for example, data from a SNOCAP study. The principal investigator, or Director in the event the principal investigator is no longer involved with SNOCAP, must agree to the preparation of manuscripts that do not directly relate to the stated purposes or hypotheses of a study.

**Presentation**

A presentation is any abstract, poster, or presentation that

- describes either a SNOCAP study or describes a study that uses SNOCAP resources or
- is presented to an audience that is outside the investigator’s institution; for example, a national meeting.
