

SNOCAP

State Network of Colorado Ambulatory Practices & Partners

SPECIAL COVID-19 ISSUE - MARCH 26, 2020

FROM OUR DIRECTOR

Dear SNOCAP partners:

Thank you for the quick response to the surveys we've sent out both last week and this week. We realize things are ever-changing amidst this current crisis, so we really appreciate the time many of you have taken to respond.

SNOCAP has worked hard to analyze results as they come in and have created a report with many of those results, as well as a resource guide. You can find that available for download as you scroll down in this email.

We are still working with [ECHO Colorado](#) as they finalize plans for a special virtual series on COVID-19. Results from our surveys have been sent to them, so the sessions are sure to be relevant and timely for those of you needing extra assistance in the field. Please be on the lookout for additional information, to come soon.

We thank you again for participating in the survey(s), and hope you find our resource guide helpful. We are dedicated to updating this guide as we feel additional relevant information becomes available.

- Don & Mary

PRIMARY CARE RESPONSE: COVID-19

What Colorado Primary Care Practices are experiencing with COVID-19

This report was created from the data received from 119 responses to the SNOCAP/PCDO survey. Thank you!

Practices want to learn more about:

- Triage Protocols
- Managing non-urgent patient visits
- COVID-19 testing criteria and recommendations
- Guidelines for conducting virtual visits
- Management of patients with suspected or confirmed COVID-19
- Management of patients with co-morbidities and suspected COVID-19
- Management of workforce-related issues related to COVID-19 including school closures, personal needs
- Management of workforce-related issues for providers at high risk
- Where to get additional PPE

29% of respondents have sent zero patients and 63% have recommended 1-10 patients for testing...

while only 4% of respondents have sent 20+ patients for COVID-19 testing.

39% of respondents do not know where to send patients for testing.

While 77% of respondents are assessing the risk status of the provider and are able to offer alternative work

If you wish to share resources with colleagues or others, please forward the email so they have access to the "clickable" content.
