

SNOCAP

State Network of Colorado Ambulatory Practices & Partners

NOVEMBER 2021

FROM OUR DIRECTOR

Dear SNOCAP partners,

We hope you had a chance to enjoy a day of Thanksgiving last week. In the middle of the pandemic it's important to do so, and reminiscent of when Abraham Lincoln instituted the national holiday in the middle of our Civil War. We are thankful of your support and all you do in your communities to contribute to health and wellness.

With that, we felt it was time again to take your pulse and find out how you are doing with a new survey. It is brief and focused.

Today, we open up our 11th COVID-19 response survey *for practices*. [Please click HERE or on the blue button below to begin.](#)

The survey will close Wednesday, December 8th at 12pm MT.

You can view past SNOCAP COVID-19 Response reports on our website by clicking the green button, below.

Thanks for taking just a few minutes to respond!

STUDY UPDATES & REQUESTS

COMING SOON: SNOCAP Annual Report

This year, we have decided to again not proceed with an in-person SNOCAP Convocation

event, due to the ever-changing nature and safety concerns related to COVID-19.

Instead, this year we will be creating an annual report, sharing what we at SNOCAP have been up to in 2021, and ways we have closely partnered with many of you; our trusted partners in this work: in practice, community, the University, and beyond.

You can be on the lookout for that in early 2022, and we will be sure to share more information in our next SNOCAP Quarterly Newsletter, projected to send in February 2022.

ACTIV-6 Study

Are you or your practice interested in participating in a COVID-19 related study?

SNOCAP has been in touch with a team working on the ACTOV-6 project, and think it could be a fairly easy and straight-forward way respond to COVID-19 in a new way.

ACTIV-6 is a national study to find out whether certain medications approved by the U.S. Food & Drug Administration (FDA) can help people with mild-to-moderate COVID-19 feel better faster.

By participating in ACTIV-6, you will help us learn more about the best ways to treat other people with COVID-19 who have mild-to-moderate symptoms.

Learn more by clicking the purple buttons, below.

NAPCRG Annual Conference Overview:

November 19-23 brought us another fantastic NAPCRG Annual Conference; held virtually for the second year in a row. For those that are NAPCRG regulars, we missed seeing you in person and sincerely hope to spend NAPCRG 2022 in person, and out of our computer screens! Huge thanks to those involved in planning the conference, and all that were there to ensure things went off smoothly.

We had a number of SNOCAP attendees and presenters. It as wonderful to jump into a zoom room and see familiar faces and names!

In time, we will share some of the presentations from this year's conference.

SNOCAP SPOTLIGHT

Name and role:

My name is Allison Sands and I am the newest business services professional in the Department of Family Medicine!

How long have you been with the Department of Family Medicine/SNOCAP?

I joined the DFM/SNOCAP team earlier this

month (November '21).

What did you do before coming to this role?

Before my role with the Department of Family Medicine, I was the assistant to the department head for Information Science at Drexel University in Philadelphia, PA.

What originally drew you to your role with the Department of Family Medicine/SNOCAP?:

While I loved my previous experience working in higher education, the chance to provide support in a high-impact department like family medicine stood out to me as a particularly exciting opportunity. I tailored my undergraduate research to study women's access to health care in rural and low-income areas, so the work SNOCAP does across Colorado is of particular importance and interest to me.

What will you be working on in your role within the Department of Family Medicine/SNOCAP?:

I will be providing administrative support for SNOCAP, as well as executive support to DFM's Vice Chair for Research and Associate Vice Chair for Research.

What do you most look forward to in your role with the Department of Family Medicine/SNOCAP?:

I am looking forward to getting more involved with SNOCAP and finding new ways I can contribute to the research process in the Department of Family Medicine.

What are the big things coming up for you professionally in the next few months?:

Currently, I'm focused on integrating into my new position at DFM and figuring out my place in the department. As time goes on, I am looking forward to becoming more involved in SNOCAP.

What has been one of your main successes, proudest moments, or biggest "aha!"s recently?:

My greatest successes recently have all revolved around my cross-country move from Delaware to Denver! My partner and I managed to drive our two very unruly cats across the country relatively unscathed, which I categorize as a huge success. I'm looking forward to finishing unpacking and settling in to the community.

What is one thing everyone reading should know about you?:

I'm a *huge* animal lover, and I foster neonatal kittens during the summer months every year. I am also a big Texas sports fan!

~~Welcome, Allison! We are so excited to have you on board and look forward to continued work with you!~~

MONTHLY MEETING

SNOCAP Monthly Meetings are a way to connect with practices and providers across the state. We use this opportunity to showcase current and upcoming work, as well as to discuss potential work and partnerships with other researchers.

NEXT MEETING: TUESDAY, DECEMBER 7TH,
12:00-1:30PM VIA ZOOM

Join from PC, Mac, Linux, iOS or Android:
<https://ucdenver.zoom.us/j/94096983934>

Or iPhone one-tap (US Toll):
+16699006833,,94096983934#

Or Telephone: Dial: 1 669 900 6833 (US Toll),
Meeting ID: 940 9698 3934
