**Customizing Speech Referrals to contain all needed information:**

1. From your Preference List > select an order you want to update > Accept

2. Click the star > select Edit preference list entry

You can add anything that you want to be saved for you to use.

A screenshot of the 'Edit My Preference List Defaults' dialog box. The title bar reads 'Edit My Preference List Defaults'. The main content area is titled 'AMBULATORY REFERRAL TO SPEECH ENT [REF2323]'. Below the title, there is a 'Display name:' field with the value 'AMBULATORY REFERRAL TO SPEECH ENT'. A note states: 'Blank values will remain blank when this order is selected from your preference list.' The form contains several fields and buttons: 'Referral:' with a search icon; 'Geog areas:' with a search icon and a 'Default Areas' button showing 'METRO DENVER'; 'To dept spec:' with a search icon; 'To dept:' with a search icon and the value 'AMC ST OP'; 'To provider:' with a search icon and a location pin icon; 'Exp date:' with the value 'S+364'; '# of visits:' with the value '12'; 'Class:' with a search icon and the value 'Internal Ref'; 'Priority:' with a search icon and buttons for 'Urgent - Next Business Day', 'ASAP - 2 Business Days', 'Routine - 5 Business Days', and 'Other - 30 Business Days'; 'Reason for referral' with the text 'see referral to laryngology' and an empty field; and 'Consultation type?' with buttons for 'One-episode consult', 'Co-managed/shared care', 'Principal disease management', and 'Transfer of responsibility'.

☆ ENTSLPORDERS	Treatment plan for SLP orders

Phase of Care:

The information needed will come up, and you can use the smartlist to choose a reason for therapy.

Comments:  Insert SmartText 

- Reason for therapy: {ENTSLPReasonforTherapy:47950}
- Number of requested therapy sessions per week: 1/week
- Total duration of therapy: 3 months

For referrals to Liz Cuadrado, please change the therapy sessions per week to 2.

You can customize Voice referrals, and Swallowing referrals so you have two different orders that are pre-built with the data.
