

## Postdoctoral Fellowships at the University of New Mexico Promoting Academic Career Development

(US Citizenship or Green Card required)

<https://hsc.unm.edu/medicine/education/reo/training-programs/asert/>

The Academic Science Education and Research Training (ASERT) IRACDA at the University of New Mexico (UNM) is seeking competitive applicants from prospective and recent PhD graduates (within first year) looking for a postdoctoral experience that embraces diversity and supports individualized career development. The program uses a cohort model of training that offers outstanding dual training in teaching and research to support a trajectory to an academic career. Successful applicants are eligible for up to 3 years of support to complete research projects (75% time) in biology, bioengineering or biomedical sciences and teach at affiliated minority serving institutions (25% time). The ASERT Program provides opportunities to train with over 50 research and education mentors that represent a diverse range of interests and expertise.

The University of New Mexico is home to exceptional research programs, including:

- Comprehensive Cancer Center (<http://cancer.unm.edu/research/programs/>)
- Clinical Translational Science Center (<http://hsc.unm.edu/research/ctsc/>)
- Centers of Biomedical Research Excellence in:
  - Autophagy, Inflammation and Metabolism <https://www.autophagy.center>
  - Center for Brain Recovery and Repair <https://hsc.unm.edu/medicine/departments/neurosciences/research-centers/center-for-brain-recovery-and-repair/>;
  - METALS exposure science <https://hsc.unm.edu/pharmacy/research/areas/metals/>
- High Technology and Materials
- Biomedical Engineering

Close collaborations with Sandia and Los Alamos National Laboratories and UNM's state-of-the-art facilities offer exceptional research and training opportunities. Fellows are supported through a NIGMS K12 IRACDA grant that is part of a nationwide network spanning over 20 institutions. *In keeping with the Training, Workforce Development and Diversity initiative at NIGMS, we welcome prospective applicants who will broaden the diversity of the biomedical workforce, including underrepresented minorities, women, socioeconomically disadvantaged individuals and those with disabilities.* Apply now for a Sept. 2021. We have 1-2 more open slots and welcome applications Apply as soon as possible for anticipated fellowship start September 1, 2021. Consult ASERT program website for more information, and online application

Your opportunity to capitalize on exceptional, interdisciplinary research opportunities and internationally-recognized educational resources can begin this September.

APPLY to ASERT Postdoctoral Fellowship at the University of New Mexico.
