

THE UNIVERSITY OF COLORADO CANCER CENTER PRESENTS

Cancer Research Experience for Undergraduates (CREU)

PROGRAM SUMMARY

Our summer research program offers 20 undergraduate students the chance to spend ten weeks in labs at the University of Colorado Anschutz Medical Campus, the largest academic medical center in the Rocky Mountain region.

The goal is to engage scientific curiosity in the next generation of scientists, challenging students to consider cancer related careers in the future.

PROJECTS & MENTORS

When applying, you can choose up to four faculty mentors in order of preference for your fellowship. Projects span from basic cancer research to translational studies aimed at applying cancer biology to clinical settings.

EVENTS AND HIGHLIGHTS

- Twice-weekly lectures
- Professional development
- Research projects
- Career guidance
- Poster presentation
- CU Denver | CU Anschutz Graduate School application fee waiver
