

### Mission of CKC

Curing Kids Cancer funds innovative research to develop cutting-edge therapies for children with cancer in support of our overarching mission *to find cures for childhood cancers in our lifetime*.

### Goal and Focus

The goal of these grants is to overcome barriers to the clinical application of new treatment approaches for childhood cancer. A priority is to fund projects that have already shown great promise, but that have a specific funding need to move forward. The main focus areas for this RFP are:

- Cancer immunotherapy or targeted therapy
- High-grade brain tumors or other difficult-to-treat pediatric cancers
- Epigenetic modifying therapy or gene therapy
- Correlative study endpoints on funded clinical trials

Applications of novel technologies (e.g. nanotechnology, omics, gene editing, bioinformatics, and AI) in these areas are welcome.

### Eligibility

- Applications will only be accepted from Children's Oncology Group member institutions in North America (no citizenship requirements).
- Open to PIs at all academic ranks with MD and/or PhD
  - Applicants should hold a **faculty position** at a Children's Oncology Group member institution.
- **Limit of one application per institution for either the Collaborative or the Individual grant with the endorsement of the Chief(s) of the Division(s) of Pediatric Hematology-Oncology.**

### Application Guidelines

Under one application, you will have an option to select one of the following.

- Types of one-year grants to be awarded:
  - o Individual: 1-2 individual grants of \$150,000 each will be awarded
  - o Collaborative: Up to 1 multi-institutional collaborative grant of \$300,000 will be awarded
    - **There must be at least 2 collaborating divisions of pediatric hematology/oncology from separate institutions.**
    - A collaborative project can either include a new proposal or a proposal where preliminary data has already been gathered.

### **\*Funding of clinical trials is excluded with the following exception:**

Applications to fund correlative studies associated with clinical trials in the focus areas will be considered. Funding for the associated clinical trial must have already been secured and applications must include a description of the developmental pathway for the therapeutic approach.

- The NIH salary cap must be employed
- 10% indirect costs from the total award will be allowed (e.g., maximum \$15,000 indirect and \$135,000 direct costs per award)
- A second year of funding may be applied for but will require a full review

### Dates

- Submission deadline: **Monday, September 14, 2026 by 12:00 PM**
- Awards will be announced at the end of the calendar year for a grant period of 1/1/2027 – 12/31/2027

### Submission Requirements

Applications must be submitted via Proposal Central (<https://proposalcentral.com/>) and will include the following:

- A. Title page
- B. Key personnel (Co-PIs must be listed)
- C. Institutional contacts
- D. Lay abstract (2,500 characters or less, including spaces – approximately 250 words)
- E. Budget details- NIH budget format
- F. Budget justification (3,000 characters, including spaces – approximately 300 words)
- G. Organizational assurances (i.e., human subject and/or animal approvals)
- H. Only the following attachments will be accepted:
  - a) Project Proposal (4-page limit), to include:
    - I. Scientific Abstract
    - II. Background/Rationale
    - III. Design/Methods
    - IV. Significance/Impact
    - V. Environment
  - b) References (1-page limit)
  - c) Biosketches in NIH format (OMB No. 0925-0001 and 0925-0002) for PIs and Co-PIs (5-page limit)
  - d) Letter of endorsement from the division **chief of pediatric hematology/oncology**. For the Collaborative Grant, a signed letter of collaboration from all Co-PIs and a joint letter of support from **each institution's division chief are required**.
  - e) For correlative study proposals linked to **funded** clinical trials please include the protocol and the NCT number or IRB approval notice.

All attachments must be submitted as a PDF document. **No other attachments will be received or reviewed.**

### Proposal Formatting

- Font: Arial, Times or Times New Roman, 11 point minimum
- Margins: 0.75 in minimum
- Top of each page should include
  - o PI (full name)

- o Institution
- o Abbreviated project title

### Review Criteria

The reviews will use the NIH 9-point rating scale, with specific ratings on the following components:

- PI(s)
- Environment
- Innovation
- Clinical impact

We look forward to working with you to complete this grant cycle. What an exciting time to have the ability to fund research!

With thanks,

A handwritten signature in black ink that reads "Gráinne Owen".

**Gráinne Owen** – Founder and President, Curing Kids Cancer

**Dr. Alan Wayne** – Co-chair, CKC Medical Advisory Board; Chair of the Department of Pediatrics, Children's Hospital Los Angeles/University of Southern California Keck School of Medicine

**Dr. Lee Helman** – Co-chair, CKC Medical Advisory Board; Chair, Osteosarcoma Institute

# Curing Kids Cancer

## Internal LOI Submission Instructions

The CU Cancer Center is inviting internal LOIs for the Curing Kids Cancer funding opportunity. Since this is a limited submission, the Cancer Center will conduct an internal review to select the strongest proposal to move forward as the Center's nominee.

### 1. Project Information

- Project title
- Principal Investigator: name, title, and email
- Co-PIs/key personnel: name, title, and email, if applicable
- Grant type: Individual (\$150,000) or Collaborative (\$300,000)

### 2. Research Summary

The research summary should be 1–2 pages total and include the sections below:

#### A. Project Overview

- What is the problem?
- What is the proposed solution?
- Why is this important for pediatric cancer?

#### B. Background and Rationale

- Brief scientific premise
- Existing data or rationale supporting the proposed approach

#### C. Proposed Research Plan

- Key aims/objectives
- Overview of methods and approach

#### D. Impact and Alignment with the Foundation's Mission

- Describe how the project addresses one or more Curing Kids Cancer focus areas:
  - Immunotherapy/targeted therapy
  - High-grade brain tumors or difficult-to-treat pediatric cancers
  - Epigenetic or gene therapy
  - Correlative studies linked to funded clinical trials
- Please also include the project's potential for clinical translation and impact.

#### E. Funding

- Include the estimated funding amount requested and a brief description of how the funds will be used.

### 3. Biosketches

- NIH-formatted biosketch for the PI and any co-PIs
- Limit: 5 pages per biosketch

## Submission Requirement

Please combine all LOI materials into one single PDF before submission. LOIs that are not submitted as one complete PDF will not be accepted.

## Submission Link

Please submit the combined PDF [here](#).

## Review Criteria

LOIs will be reviewed by a panel with relevant expertise for scientific merit, alignment with the Curing Kids Cancer mission, relevance to pediatric cancer, and potential impact. Written reviews will not be provided.

## Important Dates

**Internal LOI deadline:** Tuesday, August 11, at 11:59 pm MT.

**Internal nomination notification:** Applicants will be notified of their nomination status the week of August 17.

**Sponsor application deadline:** Monday, September 14, at 10:00 am MT. The selected nominee should be prepared to move quickly from internal notification to full application submission.

**\*These instructions are also provided in the Smartsheet submission link listed above\***
