

GRANT GUIDELINES 2024

GABRIELLE'S
ANGEL FOUNDATION
FOR CANCER RESEARCH

GABRIELLE'S ANGEL FOUNDATION: [Gabrielle's Angel Foundation](#)

- Issues grants annually and solicits applications by invitation-only
- Accepts only one application per category/per institution:
 - One Mainstream/Conventional research project
 - One Integrative Medicine research project
 - *See more detailed Integrative information, below*

APPLICANTS MUST:

- Have an MD or PhD
- Hold a junior faculty position at a 501(c)(3) teaching research institution
- Hold the designation of Assistant Professor (Associate Professors may apply for ***Integrative* projects only**)
- Have institutional support in form of tenure track **OR** be an independent junior faculty member
- Have held their current position no longer than five years (for conventional projects only)
- Clearly state that they have both independent research projects and independent resources
- Have preliminary results and/or publications from their independent laboratory

SUBMISSIONS MUST INCLUDE:

- NIH Biosketch for applicant as well as every researcher listed on the project
- Detailed proposal of the research project
- Letter of reference from the institution, commonly from the applicant's mentor or nominating committee member
- Separate page with contact information (address, phone numbers, e-mails) for both the applicant and the controller/financial officer of the institution to whom payments should be made
- Statement about any potential biohazards describing the safeguards used to prevent such hazards to the investigator, other personnel or any other individuals
 - Gabrielle's Angel Foundation assumes no responsibility or liability for any such biohazards and shall be held harmless from the results of the use of any such biohazard materials.
- **NOTE:** All submissions must include no more than five pages for letters B through E on the application. The Application Title Page and contact information page can be counted separately. The entire application must be submitted as one document.

BUDGET INFORMATION:

- The total award shall not exceed \$225,000 total (\$75,000.00 per year over three years.)
- Overhead costs cannot exceed 10% (\$22,500 total or \$7,500 per year). This amount is to be included in the \$75,000 per year award.

INTEGRATIVE INFORMATION:

- The Foundation seeks to support Integrative research projects that explore evidence-based complementary interventions, optimize the manner in which mainstream care is delivered and improve the lives of those living with cancer, specifically the hematologic malignancies.
 - Such Integrative (complementary) therapies may include:
 - Acupuncture
 - Integrative Mind-body interventions
 - Manipulative and body-based therapies

- Meditation
 - Music therapy
 - Nutrition
 - Physical fitness
 - Use of biologically-based agents (but not in “conventional” ways)
 - Yoga
- The Foundation seeks to support clinical trials and/or pre-clinical research which address reducing patients’ physical and emotional distress during or after cancer therapy.
 - Examples include:
 - Neurophysiologic, neuroendocrine, and biochemical pathways triggered by massage therapy, including animal studies or instrument-based approaches such as imaging techniques
 - Mechanistic studies of herbs, nutritional supplements, or natural products to enhance cognitive function or treat depression or anxiety
 - Herb-drug interactions
 - Basic biological mechanisms and processes that underlie acupuncture, meditation or yoga including studies in man or animal models or those employing imaging
 - Research must be compelling with firmly grounded scientific rationale and high-quality relevant methodology.
 - Proposals must reflect a solid grasp of the field and employ pragmatic research methodology and design.
 - Proposals will be evaluated for creativity, originality and scientific rigor.
 - Proposals based on promising preliminary data will be favored.
 - Applicant’s prior experience and competencies will be assessed – for integrative applications only, **Associate Professors as well as Assistant Professors are invited to apply.**

Please submit your proposal to [Gabrielle’s Angel Foundation Limited Submission Form](#) no later than May 15, 2024, by 5pm MST.

FAQ – Gabrielle’s Angel Foundation Grant Process

Q: Does Gabrielle’s Angel Foundation accept unsolicited grant applications?

A: No. Our annual grant application process is by invitation-only.

Q: Must my proposed research project focus on the hematologic malignancies?

A: Yes, Gabrielle’s Angel Foundation funds research solely focusing on blood cancers.

Q: What do you mean by ‘complementary’ research?

A: Applicants may apply in either the category of conventional medical research or research which employs the use of complementary therapies, botanical agents, or supportive care. Applicants may reference our detailed guidelines for the Integrative Medicine category, available upon request.

Q: On the application, what does “limit five pages” include?

A: The five-page limit is merely a guideline set by our Medical Advisory Board and applies mainly to letters B through E. The five pages refers mostly to the length of the research description. The contact page is not included in this page count.

Q: Our institution does not offer tenure track positions. Does this mean I am ineligible to apply for a grant?

A: Our Medical Advisory Board feels strongly that the junior investigators applying for grants with us have institutional support in form of tenure track status. We understand, however, that this means different things to different institutions since some clinical researchers may never be in the tenure-track. Therefore, 'tenure track' is not as essential as that the applicant must be an independent, junior faculty member.

Q: I have been in my current position for more than 5 years. Does this mean I am ineligible to apply for a grant?

Q: I have been in my current position for less than 5 years but it will be more than that by the time the grants are announced. Am I still eligible?

A: If you are more than 5 years at your institution this does not absolutely exclude you from applying. The five-year limitation was meant as a criteria guideline, not as a make-or-break qualification.

Q: What constitutes a “junior” investigator?

A: It is generally someone who is an Assistant Professor. Associate Professors or Full Professors are usually too senior and fellows often have no commitment from their institution. It does not take age into consideration. Associate Professors may not apply.

Q: I am not yet an Assistant Professor but will be one next year. Am I still eligible?

A: Yes, you are eligible. All applicants will be judged based at least in part on their independent work.

Q: I have a degree other than MD or PhD (i.e. ND). Am I still eligible?

A: If a candidate’s degree is equivalent to an MD or PhD, this is fine however the candidate does need to be a faculty member.

Q: Does the amount of \$75,000 include the indirect cost or is that to be calculated extra over the \$75,000?

A: The \$75,000 includes the indirect cost (10%). Otherwise, there are no restrictions.

Q: Is it permissible to include for further clarification of my grant description any previous relevant materials with my application – such as journal articles, papers, copies of treatment manuals and appendices?

A: Yes, but these must be kept to a minimum.

Q: May I include my salary and that of supporting technicians in the percentages?

A: There should be additional sources of support for the salary of the PI, however small percentages may be allotted for additional researchers on the project. The Foundation’s Medical Advisory Board ultimately wants to see the majority of the percentage awarded going directly to the research.

Q: Does it matter if I already have funding from the government (i.e. R01, etc.)? Must I include the dollar amount of these other sources of funding with my NIH Biosketch?

A: We think it’s a good thing when applicants have other funding. Please include in your application all other sources of support, including dollar amounts, both active and pending and detailed descriptions of any potential overlap with the project you are submitting with us.

Q: Do I need to include the NIH Biosketch of every researcher on the project or just the PI’s?

A: Please include the NIH Biosketch of every researcher on the project.

Q: From whom should the letter of recommendation be?

A: The person or mentor who nominated the researcher.

Q: Must applicants have their own lab or be conducting lab-based research?

A: Nearly all (but not all) of the funded proposals come from people who are doing lab-based research, but it is the quality of the work and its relationship to the goals of the Foundation that count.

Q: Is the junior faculty member allowed to have a Co-PI on the grant?

A: They can, but it must be well justified. Also, it is unusual and will be looked at carefully.

Q: Can I submit studies that are hematological in nature even if it doesn’t pertain to blood cancers, per se?

Q: Are there any citizenship restrictions for applicants?

A: Our grants are very competitive, but this does not make an applicant ineligible, just potentially less competitive.

Q: What should our institution use for the project period start and end dates for this grant?

A: You can use January 1 but these grants rarely begin on that date as each institution, once notified, must route the paperwork through the proper channels. This takes varying lengths of time from cancer center to cancer center. These usually time out to start in February-March of the following year.
