Internal Medicine Residency Program Match Results

Residents, Fellows, Faculty and Staff,

I am thrilled to announce the results of this year's Internal Medicine Resident Match. Once again, the University of Colorado Internal Medicine program is going to be infused with the energy, excitement, and talent from another fantastic group of incoming doctors.

The interns who will arrive here in June are incredible. The 72 incoming interns (Categorical, Primary Care, Hospitalist, Physician-Scientist, and Preliminary Tracks) hail from 27 states and Brazil and represent 41 different medical schools. 24% of our incoming class comes from groups that are underrepresented in medicine - the largest group of URiM interns we have ever welcomed to Colorado - and 54% of the interns are women. All of these factors add important layers of diversity to our campus. We have several excellent students from the University of Colorado who have chosen to give three more years to our campus and many, many more who will be joining us for the first time from across the country and the world. This group truly represents the best and brightest among the applicants to Internal Medicine this year.

A big thank you to everyone who helped make this recruitment season an unqualified success. From our residents who showcased what our program stands for each recruitment day (and at the night before events); our faculty who engaged in hundreds of interviews across several months; our coordinators and staff who made the entire season come together, from pre-look events to the interview days themselves to our second looks (not to mention websites, social media, and more) – thank you!

Please join me in welcoming our incredibly talented incoming class of interns.

Geoff

Geoffrey R. Connors, MD, FACP
Associate Professor of Medicine, Division of Pulmonary and Critical Care
Director, Internal Medicine Residency Program
DOM Vice Chair for Education
