

FRONTLINE HEALTH CARE WORKERS: HOW TO KEEP COVID-19 OUT OF YOUR HOME

Recommendations from a group of EM physicians and nurses in the Bay Area

PREP: CREATE AND MARK A HOT-ZONE

near your home entrance

Using tape, mark off hot-zone (contaminated area) outside front door, inside garage, or inside and near the first entry point to your home. Place the following materials inside:

- A basket for clothes and loose items
- Hand sanitizer (at least 70% alcohol)
- Sanitizing wipes (if unavailable, use baby wipes and alcohol)
- Coat rack or hook for outerwear/coat

STEP 1: DEROBE AND SANITIZE IN HOT-ZONE

upon returning home each day

Stand in hot-zone.

Sanitize hands.

Carefully remove clothes to avoid contaminating surroundings.

Place jacket and bag on hook or rack, and hospital clothes into basket.

Remove shoes, and leave in hot-zone.

Disinfect phone, keys, and other loose items.*

Disinfect door knob and any other surface touched while entering.

STEP 2: WASH CLOTHES AND SHOWER

as soon as possible

Place clothes in washing machine or laundry bag designated for contaminated clothes. Wash clothes when appropriate for your context.

Wash hands with soap and water for 20 seconds.

Shower as soon as possible.

Put on clean clothes.

Please tailor these suggestions to your specific space and context.

*See support.apple.com/en-us/HT207123 for additional instructions for phones.
