

Perceived Palliative Care Needs in Huntington Disease

The purpose of this study is to learn more about the needs, care preferences, and concerns of patients with Huntington's disease (HD) and their caregivers.

This study involves one visit (that may be done in person or over the phone) at the **University of Colorado Anschutz Campus**. Compensation is provided.

Inclusion Criteria

- Patient with known Huntington's disease and caregiver or family member of those diagnosed with Huntington Disease
- 18 years or older
- Exclusion: Non-English speaking

Procedures

- Participants diagnosed with Huntington's disease and caregivers will answer interview questions from the study team about their perspectives on HD and care needs.

Please contact Neurology Research Partners at 303-724-4644 or NeurologyResearchPartners@ucdenver.edu to learn more and see if you qualify.
