

## Adults with Younger Onset Dementia Needed for Quality of Life Research

**This research will help us understand the healthcare needs which affect quality of life for individuals with early onset dementia and their caregivers.**

Photos courtesy of the Centers for Disease Control (CDC)

**This study involves a single in-person or telephone interview lasting one hour with participants and their caregivers and includes discussions of:**

- Illness-related symptoms
- Stress related to your diagnosis
- Quality of life
- Caregiver strain
- Spiritual well-being
- Care planning
- **NOTE:** The presence of a caregiver is not required for participation

**You may qualify if you are:**

- 18 years or older
- Diagnosed with Alzheimer's disease or Frontotemporal dementia
- Have symptoms that began before the age of 65
