

## **Multiple Sclerosis Patients are Needed for a Research Study About Ocrelizumab**

Researchers from the University of Colorado and Rocky Mountain MS Center are conducting a study to investigate the safety of administering a 2-hour infusion of ocrelizumab in patients' homes.

This research study will examine the safety of a single, rapid (2-hour) ocrelizumab infusion administered in patients' homes as well as learn about patients' experience with this method of infusion administration.

Eligible participants will receive a single in-home, rapid (2-hour) infusion of ocrelizumab. All participants will be monitored by a trained nurse and will be asked about their experience of receiving the infusion at home.

### **You may be eligible to participate if you:**

- Are between 18 and 55 years old
- Have a diagnosis of MS
- Are currently prescribed ocrelizumab for the treatment of your MS

If you are interested in participating, please contact Neurology Recruitment Partners by calling **(303) 724-4644** or by email at **NeurologyResearchPartners@cuanschutz.edu**
