PI: Maureen Leehey, MD

Professor of Neurology

Chief, Movement Disorder Division

University of Colorado Denver

## ***Cannabidiol (CBD) Research on Parkinson Disease Patients with Motor Symptoms***

### **Purpose:**

This research plans to learn more about how well CBD is tolerated and works to treat symptoms of Parkinson's disease (PD).

### **Main Procedures Involved:**

1. Taking a CBD cannabis extract or a placebo.
2. Testing of motor and non-motor symptoms of PD.
3. Blood samples for testing chemistry, hematology and cannabis test.
4. Interviews and questionnaires focused on marijuana use, thinking and memory function and health history.

### **Main Inclusion/Exclusion Criteria:**

#### **Inclusion criteria:**

1. Between 40 and 85 years of age.
2. Idiopathic Parkinson disease with tremor.
3. Fixed anti-parkinsonian medications for at least 1 month.
4. Have a driver to drive to and from study visits.

#### **Exclusion criteria:**

1. Cannabinoids taken currently or in the previous 30 days.
2. History of drug or alcohol dependence.
3. Is pregnant, breast feeding, or unwilling to avoid getting pregnant during study participation
4. Known or suspected allergy to cannabinoids
