Study of Sleep and Memory

The University of Colorado is conducting a research study to understand how boosting normal brainwaves might improve sleep and memory function.

Eligible participants will wear a device to measure and reinforce normal sleep brain waves while in their homes and complete memory and thinking testing.

You may be eligible if you are:
- Are between 18-85 years old and in good general health
- Do not have thinking or memory difficulties
- Have no diagnosis of sleep disorders

Compensation Provided

Please contact Neurology Research Partners at (303) 724-4644 or NeurologyResearchPartners@ucdenver.edu to learn more about the study and see if you qualify.
