

NEUROSURGERY *in the Rockies*

NSIR COURSE OBJECTIVES

At the conclusion of this activity, participants will be able to:

- Identify new endovascular and open techniques for brain aneurysm treatment.
- Identify best practices in multidisciplinary collaboration on stroke therapy.
- Identify new technological advancements in stroke treatment.
- Analyze and translate updates to the clinical practice of neuro-oncology, spine, and functional neurosurgery to applications pertinent to one's own practice environment.
- Identify current standards of care relevant to private practice general neurosurgery

NSIR GENERAL INFORMATION

Neurosurgery in the Rockies is an intimate gathering hosted by the Department of Neurosurgery at the University of Colorado School of Medicine and the Colorado Neurosurgical Society. Our goal is to provide an environment in which neurosurgeons can exchange ideas, meet new friends and enjoy the natural beauty of the Rocky Mountains. This conference is designed for neurosurgeons, residents, and allied health professionals who have an interest in the clinical neurosciences. The first two days of the conference will be subspecialty focused in the area of Vascular Neurosurgery and the final two days will include general neurosurgery topics relevant to private practice and academic neurosurgery transitioning from cranial topics to spine as the meeting progresses. Special topic lectures will be given by internationally renowned visiting and local faculty.
