

## CU REproduction (**CURE**) Review Panel 2022

### Minimum requirement for submission:

1. Title, Abstract, Specific Aims, Research Strategy, Literature Cited, Personnel justification, Biosketches for key personnel including mentors for K awards (for non-NIH applications: corresponding components).

If resubmission: Summary statement/reviewers critique and Introduction/response to critique must be included.

2. **The proposal has to be complete and nearly ready for submission to the funding agency.** The purpose of the CURE Review Panel is not to replace critical input from mentors (junior applicants) and numerous revisions by the PI and the investigative team. Instead, the objective of the CURE Panel review is to take the application to the next level by identifying any weaknesses and potential flaws.

3. Suggestions for ad-hoc, external (University of Colorado | Anschutz Medical Campus, but not in OB/GYN or Neonatology or outside CU | AMC) reviewers with particular expertise to review the application.

4. Request for application/call for proposal details, if submitted in response to specific Program Announcement and Request for Proposals.

5. For funding agencies other than NIH: Information on required format.

*Submissions will be pre-screened and if minimum requirements are not met, the proposal will be returned to the applicant.*

**Note that we use hard deadlines for submission, no exceptions**

**Submit proposal as a single pdf file to** Thomas Jansson ([thomas.jansson@cuanschutz.edu](mailto:thomas.jansson@cuanschutz.edu)). For the purpose of scientific editing, also include the research proposal as a word file.

If you have questions or suggestions: Please contact Thomas Jansson ([thomas.jansson@cuanschutz.edu](mailto:thomas.jansson@cuanschutz.edu))
