

## **Medical Student Education**

### **Developing Our Clinical Skills program (DOCS)**

This program is for medical students during their first year. Preceptors are paired with a student to teach the fundamental skills necessary for taking a history and performing a physical exam.

Qualifications: MD/DO providers from any discipline.

Commitment: 10 half-days per academic year

303-724-5061

### **Longitudinal Integrated Curriculum (LIC)**

Medical students in their second year are paired with a preceptor from each of the core disciplines. They spend one half-day each week with the preceptor, gradually learning the basics of their specialty. The gradual layering of experience over time promotes better retention of material and the opportunity to see both health and disease along a natural continuum. Students and preceptors alike find this a very rewarding experience.

Qualifications: MD/DO Pediatricians

Commitment: one half-day per week, approximately 75% of the year. One student can be shared between two providers in the same site.

## Warren Village

*(This clinic is currently on pause)*

Course Description: This is a semester-long opportunity for first- and second-year medical students to learn history and physical exam skills in a non-pressured environment.

Qualifications: General Pediatricians

Commitment: One or more evenings per semester. The Healthy Beginnings Clinic at Warren Village is held on Wednesday evenings from roughly 6:30-9:30pm.
