

Lipid Calculator Privacy Statement

Last Updated: October 2020

Lipid Calculator App collects no data or cookies from you.

We have no means to do so.

The Lipid Calculator is self-contained to calculate monoisotopic molecular weight of selected lipids as well as common $[M+H]^+$ and $[M-H]^-$ ions as well as possible adduct ions. No data outside the program is needed and your selected choices for lipid or molecular species subtype is not retained in the program.

If you have any suggestions or problems with the program you are free to contact the developer at the following email address:
