

INFANT DEVELOPMENT RESEARCH STUDY

PI: Kristin Uhler, Ph.D.
CU Anschutz Medical Campus
Building 500
SPOT Laboratory

Purpose:

To study how infants' ability to differentiate speech sounds develops and how this ability affects other measures of auditory development.

Time:

The study will occur across 9 months at 4 timepoints.

*Additional visits may be needed

Compensation:

Participants will be compensated for their time.

*Parking and some transportation may also be compensated

Eligibility:

- Infants between 1 and 6 months of age
- Normal hearing OR diagnosed with permanent bilateral hearing loss
- English as primary language spoken at home
