

Burn Patient with Positive/Rule-Out COVID-19 Placement Guideline

- Upon admission primary service designation will be based on chief complaint
- Burn/wounds will be evaluated for Burn Center admission within the context of identifiable symptoms associated with COVID-19
- **Patients with burn-specific needs who are asymptomatic for COVID will be admitted according to standard considerations**
- Patients admitted based on a medical complaint who have been burned or previously burned will be evaluated as medical patients with consideration given to wound care in designated COVID-19 areas
- We will identify nurses/CNAs on the unit who are able/willing to volunteer to assist in the care of COVID-19/rule-out patients in either cohorted areas or on the unit, for as long as we are able to permit volunteer preferences and as long as patient care is not compromised
