

PALLIATIVE CARE AND AGING RESEARCH TRAINING (T32)

Funded by a Ruth Kirschstein National Research Service Award NRSA T32 from the National Institute on Aging (NIA), this Program builds on the significant Palliative Care expertise and research opportunities within the University of Colorado. Participants become members of the community of scholars at the University of Colorado and are provided with the full array of resources available within the Department of Medicine and the Colorado Clinical & Translational Sciences Institute (CCTSI).

Training Components:

- Mentorship
- Interdisciplinary Research Training & Experience
- Professional Development Opportunities
- Research Seminar and Journal Club
