

Division of Hospital Medicine  
UNIVERSITY OF COLORADO ANSCHUTZ MEDICAL CAMPUS

# Advanced Hospital Medicine Clinical Scholars

one year program

## Develop expertise in:

- **Point-of-Care Ultrasound**
- **Advanced Evidence-Based Medicine**
- **Bayesian Reasoning in Clinical Decision-Making**
- **Medical Education**

### Contact:

Amiran Baduashvili, MD  
Program Director  
Associate Professor of Medicine  
University of Colorado, Denver

## → POCUS

- Build advanced skills in cardiac, lung, abdominal, lower extremity venous, renal/urinary system, and musculoskeletal ultrasonography under guided mentorship.
- Complete the full ACCP/Chest online image portfolio and start the process for obtaining POCUS certification from the Society of Hospital Medicine.
- Mentor and teach internal medicine residents taking POCUS elective. Actively participate in faculty development in POCUS.

## → EBM

- Master critical appraisal of variety of study designs including observational studies, randomized clinical trials, Bayesian analysis of trials, conventional meta-analyses, meta regression, and network meta-analyses.
- Learn Bayesian approach to clinical decision-making
- Lead journal club sessions and EBM curriculum delivery to internal medicine residents.
- Become a peer-reviewer for a reputable medical journal.

## → and more...

- Build specific skills pertinent to hospital medicine practice, such as quality and patient safety, addiction medicine, clinical operations, and leadership.
- Develop an area of interest, and produce a scholarship in that area by the end of the academic year.
