

Myositis Interstitial Lung Disease Research Study

The purpose of the study is to research a new treatment (Abatacept) for Myositis related interstitial lung disease (ILD).

As part of the study, you will undergo physical examination, Pulmonary Function Testing (PFT) and safety lab testing.

To qualify for study participation, you must be:

1. Over 18 years old
2. Diagnosed with Myositis Interstitial Lung Disease (ILD)
3. Not pregnant or breastfeeding

For other inclusion criteria, please contact the study team.

For more information, please contact Mallery Crow Adams at 303-724-8403 or Mallery.CrowAdams@ucdenver.edu

“Abatacept for the Treatment of Myositis-associated Interstitial Lung Disease (Attack My-ILD)”
