

We invite you to start the year off with a dynamic new career opportunity. Avanti Therapy, a leading outpatient PT clinic in beautiful Boulder, Colorado is seeking an experienced Physical Therapist for 32-40 hours a week. We provide an exceptional environment where patients are scheduled for an hour so that therapists can fully utilize their skills and complete their paperwork within the visit. This provides YOU with the time needed to provide the best care possible.

We have a unique Schroth physiotherapeutic scoliosis-specific exercise (PSSE) specialty program for those with scoliosis. We are looking to find the ideal candidate to attend a PSSE training and become an integral part of our collaborative team. All expenses will be covered by the clinic. Upon returning from training, the candidate will meet regularly with their mentor and spend dedicated time monthly with the therapeutic team collaborating on patient care. This is a highly rewarding way to expand your skillset while supporting a vulnerable and under-treated population.

Aside from our scoliosis program, we have a varied and interesting orthopedic and sports patient population. Therapists with experience and specialization in Manual Techniques, Dry Needling, and strong Exercise Prescription skills are encouraged to apply. Pilates or other specialized movement training is a plus but is not required.

Other benefits include:

- Therapist owned clinic
- Knowledgeable, caring, and collaborative team of co-workers
- Supportive and compassionate administrative staff
- Clinic places great emphasis on being a safe haven for our patients, PTs, and administrative staff
- Opportunities for continuing education and professional development
- One hour patient visits
- Private treatments rooms
- Retirement plan and health insurance benefits available

Please contact Heather for further information or to be considered: 303-378-9727.
