COLORADO ACCIDENT & INJURY

Physical Therapist

Thornton, Colorado | Outpatient Orthopedic & Injury Rehabilitation

The opportunity

Colorado Accident & Injury (CAI) is seeking a Physical Therapist for our Thornton, Colorado location. Join a multidisciplinary practice focused on helping patients recover from motor vehicle accident injuries through coordinated medical care, physical therapy, chiropractic care, and massage therapy.

We are looking for a thoughtful clinician with strong orthopedic assessment skills, an active rehabilitation approach, and a commitment to clear communication and measurable patient progress. You will collaborate with the medical director and treating providers to deliver individualized care. The patients are all recovering from minor injuries in a personal injury setting.

Care is directed like sports medicine rehabilitation with some concussion care and vestibular therapy. Rough age range: 18-60 years old.

Job Description

- Perform comprehensive evaluations of musculoskeletal injuries, pain, mobility limitations, and functional impairments.
- Develop and implement individualized treatment plans using therapeutic exercise, neuromuscular reeducation, manual therapy, and patient education as clinically appropriate.
- Monitor functional outcomes, reassess progress, and modify care based on clinical findings and patient goals.
- Communicate clinical concerns and rehabilitation progress to the medical director and colleagues, and coordinate referrals or further evaluation when indicated.
- Complete timely, accurate evaluations, progress notes, and discharge summaries that clearly document findings, functional limitations, treatment response, and ongoing needs.

Qualifications

- Graduate of an accredited physical therapy program; active Colorado PT license or eligibility for licensure before the start date.
- Strong orthopedic examination, clinical reasoning, exercise prescription, and documentation skills.
- Outpatient orthopedic, sports medicine, or injury rehabilitation experience preferred.
- Concussion or vestibular rehabilitation training is welcome; ability to work collaboratively and manage a clinical caseload is essential.
