

Collaborative Clinical Learning Experience I

Week 1 Skill Check off

Student Name: _____

Please assess students individually while completing skill on actual patient. For each objective, place check mark if observed and assign final score based on overall performance in Trial 1 and/or Trial 2. Use comments section for notes about student performance. If a student receives a low pass, they will need to meet with the CCLE I coordinator to review the skill.

Assign Final Score as follows:

Pass (P): The student meets all objectives for each skill and demonstrates consistency.

Low Pass (LP): The student meets all objectives but does not demonstrate consistency.

No Pass (NP): The student does not meet objectives during two trials.

Skill: Transfer	Trial 1	Trial 2	Final Score
The student verifies the absence of contraindications/precautions for transfer (i.e. weight bearing status, dizziness, vital signs, etc.)			
The student uses patient-friendly language to explain what is about to happen.			
The student appropriately positions the patient and any equipment used and provides adequate support throughout transfer.			
The student demonstrates proper body mechanics throughout transfer.			
Comments:			

Skill: Goniometry	Trial 1	Trial 2	Final Score
The student correctly positions the patient, exposing the joint and its landmarks.			
The student aligns the goniometer with the landmarks and maintains alignment throughout completion of skill.			
The student correctly reads and records the range of motion of the joint being measured.			
Comments:			

Skill: MMT	Trial 1	Trial 2	Final Score
The student correctly positions the patient, exposing the appropriate region and identifying landmarks			
The student assesses the unaffected side and AROM/PROM/endfeel bilaterally			
The student applies pressure with appropriate hand position			
The student correctly grades the muscle being tested.
