

## Integrated Clinical Education I Week 1 Skill Check off

Student Name: \_\_\_\_\_

Please assess students individually while completing skill on actual patient. For each objective, place check mark if observed and assign final score based on overall performance in Trial 1 and/or Trial 2. Use comments section for notes about student performance.

Assign Final Score as follows:

Pass (P): The student meets all objectives for each skill and demonstrates consistency.

Low Pass (LP): The student meets all objectives but does not demonstrate consistency.

No Pass (NP): The student does not meet objectives during two trials.

Skill: Transfers (inpatient setting only)	Trial 1	Trial 2	Final Score
The student verifies the absence of contraindications/precautions for transfer (i.e. weight bearing status, dizziness, vital signs, etc.)			
The student uses patient-friendly language to explain what is about to happen.			
The student appropriately positions the patient and any equipment used and provides adequate support throughout transfer.			
The student demonstrates proper body mechanics throughout transfer.			
Comments:			

Skill: Goniometry (outpatient setting only)	Trial 1	Trial 2	Final Score
The student correctly positions the patient, exposing the joint and its landmarks.			
The student aligns the goniometer with the landmarks and maintains alignment throughout completion of skill.			
The student correctly reads and records the range of motion of the joint being measured.
