Integrated Clinical Education – Planned Learning Experience (PLEX)

Plex #: 18	Plex Title: Use of self-report outcome measures	Date created: 6/30/2014

ICE Week/Number	Continuum of Care	Patient Management Component	Curricular Thread	
☑ ICE I- Week I	☐ IP Acute/ICU	☑ Exam/Eval	☑ Quality Improvement and Safety	☑ Patient Centered Care
☑ ICE I- Week 2	☑ IP Rehab	☑ Dx/Prognosis		☐ Movement for Participation
☑ ICE II	☑ Outpatient	☑ Plan of Care	☐ Teamwork and Collaboration	☑ Clinical Reasoning and Evidence Based Practice
	☐ School	☐ Intervention		
	☐ Not Setting Specific	☑ Outcomes		

Brief Description of the Planned Learning Experience:

Students will score and review a patient self-administered functional outcome measure (eg. OPTIMAL, QuickDASH, LEFS, Oswestry, NDI, Barthel Index etc.). Students will discuss choice of outcome measure, results, and implications for plan of care.

Objectives	Description of Actual Learning Experience	Anticipated time to complete	Recommended Preparation or Readings
1. The student will identify appropriate patient self-reported functional outcome measures for a specific patient population. 2. The student will demonstrate correct use of instructions and scoring with the functional outcome measure chosen. 3. The student will engage in discussion with CI to understand rationale for selection of specific measure, implications of results, and gain feedback on utilizing results in a plan of care.	1. Student and/or CI will identify patient that requires completion of a self-report functional outcome measure. 2. The student will present the outcome measure to the patient, provide correct instruction on completion, and score the measure accurately. 3. CI and student will discuss rationale for selection of specific test, implications of results, relationship to patient management. A review of psychometric properties (eg. reliability, validity, sensitivity,) of the specific measure chosen may also be performed.	1. Instructions to patient and time for patient completion 5-10 minutes. 2. CI and student discussion 20-30 minutes. Total: 30-40 minutes.	1. Material from Exam/Eval I related to self-report outcome measures 2. Guide to PT Practice description of outcome measures
