Brief Description of the Planned Learning Experience:

Students and CI will discuss the process for referral for PT services in school-based setting and how patients (students) are deemed eligible.

Objectives	Description of Actual Learning Experience	Anticipated time to complete	Recommended Preparation or Readings
1. Students will understand the role of a PT in the school setting. 2. Students will understand how a PT becomes involved in the care of a child in the school setting. 3. Students will understand how a child's medical diagnosis impacts eligibility for school-based PT	1. Students and CI will discuss the role of a PT in the school setting including how and why PTs become involved in the care of a child (i.e. related to the IEP). 2. Students and CI will contrast the role of "medical diagnosis" plays in driving PT referral in non-school PT practice settings vs. school setting and discuss the role of "educational benefit" in the school PT plan of care. *Discussion can focus on one case as a way to illustrate the above discussion topics.*	Discussion = 15-30 minutes	Human Growth and Development lecture: "EI, School and IDEA"
