FUNDED/IN REVIEW GRANT ACTIVITY

Ongoing Support

Colorado Maternal and Child Health Cooperative Agreement 2022-2275 09/01/2022 – 08/31/2024

Role: Co-Investigator

Screening for Developmental, Social, and Emotional Concerns among Young Children. This project seeks to address the developmental, social, and emotional needs of children (and their families) by 1) increasing the number of pediatric and family medicine practices implementing Healthy Steps, 2) enhancing screening processes, and 3) improving family engagement. (\$94,200)

Zero to Three (U.S. Health Resources and Services Administration) 07/01/2023 – 06/30/2027

Role: Research Consultant

Early Childhood Developmental Health Systems – Implementation Site. The purpose of this project is to advance statewide systems of comprehensive early childhood developmental promotion, screening, and intervention that improve outcomes and reduce disparities for children experiencing poverty. (\$1.5M)

In Review

Robert Wood Johnson Foundation

04/01/2024 – 03/31/2026

Role: Co-Investigator

Policies for Action: Policy Research to Advance the Inclusion of Immigrant Families and Children. This project seeks to advance the social, economic, and civic inclusion of immigrant children and families by ensuring equitable access to and use of early childhood service systems (health, developmental, educational, etc.). (\$450,000)

Completed

Early Milestones Colorado Circle Grant

Role: Co-Investigator

09/01/2022 – 08/31/2023

Making Early Care and Learning in Colorado More Equitable, Inclusive, and Sustainable. This project seeks to reduce disparities in early identification and intervention for young children with developmental concerns by 1) fostering relationships with 3 community-based organizations, 2) co-creating a joint learning collaborative focused on early identification and intervention, and 3) training key personnel to sustain the collaborative. (\$228,920)

CDC/AUCD 6 NU38OT000280-02-02

09/01/2021 – 08/31/2023

Role: Co-Investigator

Improving systems to support early identification of children with developmental delay. The objectives of this project are to identify current barriers and opportunities across early childhood systems to improve 1) parent-engaged developmental monitoring, 2) developmental screening, 3) referral, and 4) receipt of early intervention services. (\$188,000)

Comprehensive Opportunities in Rehabilitation Research Training Program.

5K12HD055931-13

09/01/2018 – 08/31/2021

Role: Scholar, Project PI

Reducing disparities in therapy utilization through community-based participatory research. The objectives of this study include: 1) employing a robust, community-based participatory research process to create a novel decision support tool for use in pediatric primary care settings; and 2) determining the feasibility and acceptability of the tool in pediatric primary care settings. (\$360,000)

Magnusson D (PI)

Center on Health Services Training and Research 01/01/2020 – 12/31/2020
Use of Health Information Technology to Guide Therapy Referrals for Children at Risk for Developmental Delay. The long-term goal of this work is to develop a clinical decision support tool that leverages child and family data to better predict developmental trajectories for children at risk for developmental delay through the following specific aims: 1) identify child and family level factors associated with developmental outcomes at ages 3 and 5 years; and 2) develop a robust predictive tool that will serve as the basis for a clinical decision support tool for children ages 5 years and younger. (\$25,000)

McManus B (PI) Academy of Pediatric Physical Therapy 01/01/2020 – 12/31/2020
Role: Co-Investigator
Transition of Children with Neuromotor Disabilities from the NICU to Early Intervention. Specific Aims: 1) Examine the associations between infant characteristics and service timing, type, and intensity among a sample of NICU graduates with or at risk for neuromotor disability who were referred to Early Intervention; 2) Describe the associations between service timing, type and intensity and functional outcomes among a sample of NICU graduates with or at risk for neuromotor disability who were referred to Early Intervention. (\$25,000)

Magnusson D (PI)
CCTSI Community Engagement Program 11/01/2018 – 10/31/2019
Promoting Early Identification and Intervention for Children with or at Risk for Developmental Delay. The primary objective of this pilot project is to inform the dissemination and evaluation of a community-based tool that (1) enhances shared decision-making between caregivers, family members, and service providers, and (2) improves early identification and intervention for children with or at risk for DD. This aligns with our broader goal of developing a community translational research agenda that raises awareness, highlights the importance of community-based solutions, and reduces racial/ethnic disparities in the early identification of children with DD living in the 2040 footprint, and their use of early intervention services. (\$30,000)
