# COVID-19 RESEARCH OPPORTUNITY FOR PEOPLE WITH DOWN SYNDROME

The Crnic Institute Human Trisome Project Biobank™ is currently investigating COVID-19 in people with Down syndrome and how they recover.

## WHY PARTICIPATE?

- This sub-study is focused on how COVID-19 affects people with Down syndrome and impacts their recovery.

## WHAT IS INVOLVED?

- A blood draw, a mouth swab, and allowing researchers to look at your health information.
- You may also participate in additional optional procedures or take part in the study for a longer time frame.

## WHO CAN HELP?

- Anyone who has Down syndrome ages 6 months – 89 years old.
- We are currently only enrolling people who have recovered from COVID-19. No COVID test results will be returned to the participant.

## INTERESTED?

If you are interested in learning more about this research project, please contact us at:
