

Linda Crnic Institute
for Down Syndrome

UNIVERSITY OF COLORADO
ANSCHUTZ MEDICAL CAMPUS

RESEARCH TO DEVELOP THE CRNIC HUMAN TRISOME PROJECT BIOBANK

The purpose of this study is to provide qualified and approved researchers with access to biological samples and health information to answer specific research questions.

WHY PARTICIPATE?

This project will significantly increase the speed of Down syndrome research and the understanding of associated medical conditions such as leukemia and Alzheimer's disease.

WHO CAN HELP?

1. Anyone who has Down syndrome ages 6 months – 89 years old.
2. Anyone who does not have Down syndrome ages 6 months – 89 years old

WHAT IS INVOLVED?

- A successful blood draw, a mouth swab, and allowing researchers to look at your health information
- You may also participate in additional optional procedures or take part in the study for a longer time frame

INTERESTED?

To learn more about this research project, visit www.trisome.org or email htp@ucdenver.edu.

Compensation will be provided.
