

Social-Emotional, AI-Powered Avatar Simulations: Improving Communication & Building Empathy for All!

Clint Carlson, MS

Director of Education Technology Initiatives

November 11, 2024
12:00-1:00pm MT

Ed2 North 1308
Zoom

[RSVP Here](#)

Learning Objectives

- Learners will be able to demonstrate an understanding of the power of avatar-based simulation to emulate human emotional interactions, better preparing any soft-skills before interacting with individuals in-person.
- Learners will be prepared to create their own avatar logic of A.I. & human generated choices and emotional reactions that can be replicated for their specific use case by participants.
- Learners will understand the vast applications for these technologies that are available today and can be applied to solutions addressing communication needs across public health and beyond.

CU Avatar Portfolio can be view here: <https://xr.cuanschutz.edu/>
