Falls Prevention on the Ground: Growing and Sustaining Texercise

May 17, 2021

12:00-1:00 PM MT

[RSVP Here](#)

*Will be sent via
registration email

zoom

Learning Objectives:

- Understand the basic components of an evidence-based physical activity program that addresses fall risks
- Create an evidence-based program from a practice-based activity
- Evaluate the outcomes applying RE-AIM framework with attention to difficulties of evaluating programs in real-world settings
- Apply lessons learned regarding expanding reach, ensuring program adoptability and implementation; and promoting long-term sustainability
