Sustainability, Value, and Cost: Developing Enduring Health Care Interventions

Marcia G. Ory, PhD, MPH
Regents and Distinguished Professor
Texas A&M School of Public Health
Founding Director
Texas A&M Center for Population Health and Aging

Falls Prevention on the Ground: Growing and Sustaining Texercise

Learning Objectives:
• Understand the basic components of an evidence-based physical activity program that addresses fall risks
• Create an evidence-based program from a practice-based activity
• Evaluate the outcomes applying RE-AIM framework with attention to difficulties of evaluating programs in real-world settings
• Apply lessons learned regarding expanding reach, ensuring program adoptability and implementation; and promoting long-term sustainability
