

Pediatric Stroke Program

WHO WE ARE

The Pediatric Stroke Program began in 2006, utilizing strengths from the University of Colorado Hemophilia and Thrombosis Center (HTC) and Children's Hospital Colorado. Patients receive care at the HTC clinic on Anschutz Medical Campus and have powerful resources available through this unique union. The program provides comprehensive, multidisciplinary services for pediatric patients and their families who are diagnosed with stroke and stroke-related diagnoses.

Our goal is to provide the best possible care for our patients from stroke onset through long-term follow up. Our team is committed to providing state-of-the-art care to children with stroke through innovative research, as well as participation in international pediatric stroke research trials. Our team is dedicated to increasing awareness of pediatric stroke by educating patients, families, and the community.

The Pediatric Stroke Program is the largest in the Rocky Mountain Region, and is devoted to treating and preventing pediatric stroke. We are here to help you and your family through what can be a difficult experience. We consider it an honor to participate in the care of your child.

WHAT WE DO

Services Available
